PROFILE

I'm a Java developer web-oriented. I love coding and it shows in the quality of my work and my constant motivation to tackle new challenges. As a proactive individual and a team player with over 7 years of experience in Java and web-oriented architecture, I have both the tools and the necessary mindset to take on all types of projects. I am perhaps best known for my emphasis on designing applications from the end-user point of view.

EXPERIENCES

07/2008 – present : freelance analyst programmer at the European Parliament : J2EE web application.

06/2006 – present : creation and management of a company : Lemmics sprl : www.lemmics.be : produces softwares for small companies : J2EE web application, websites (presentation, cms, ecommerce, ...).
